The Océ expert team behind the Canon imageRUNNER ADVANCE C9000 PRO series

Canon imageRUNNER ADVANCE C9000 PRO series

All-in-one production colour printer to advance your possibilities

Now, the best printer for your business isn't just a printer. It's a perfect-fit, all-in-one production colour printer that delivers the perfect balance of quality, productivity and versatility - backed by world-class Océ service. With the multi-talented imageRUNNER ADVANCE C9000 PRO series of digital production colour printers, you can quickly adapt to changing business conditions. Produce high-quality personalised colour jobs at productive speeds of 70 and 60 images per minute. And expand your service offering by adding more media and finishing options. The result? An all-in-one production colour printer designed to fit your business perfectly - and advance your possibilities.

Océ and Canon

In 2010, Océ joined the Canon family to create the global leader in the printing industry. This compelling combination combines a 130-year heritage of Océ customer-driven innovation with the vast technical and financial resources of Canon. The result? Unmatched scale in research and development, manufacturing and distribution, together with accelerated development of new innovations and the industry's broadest choice of hardware, software and workflow solutions.

"Power your colour business with this all-in-one production printer."
Productivity and quality expert

Impress your customers by offering great quality, rapid turnaround and more services

The perfect fit for your business

What makes the imageRUNNER ADVANCE C9000 PRO series the perfect fit for your print business? It offers the combination of high quality, productive speed and versatility you need to offer more services and complete more jobs on time, every time. On the right media, with the right finishing options and vivid, consistent colour quality. So you can offer your customers all the benefits of a one-stop shop - with no tradeoffs or compromises.

Choose the speed that's right for you

To support a range of requirements, the imageRUNNER ADVANCE C9000 PRO series includes two models. The imageRUNNER ADVANCE C9070 PRO and C9060 PRO systems print 70 and 60 colour images per minute, respectively. They scan up to 200 black & white images and 140 colour images per minute. All with the quality your customers expect and the productivity you need. What's more, both systems have a modular design that lets you choose from printer or printer/copier/scanner, three types of paper input, a variety of finishers and two colour servers.

High-end colour technologies for high quality output

The imageRUNNER ADVANCE C9000 PRO series employs high-end colour technologies like real-time colour calibration and advanced toner technology. The sophisticated micro-dispersed pQ toner expands the colour reproduction area and provides exceptional fusing and gloss performance. Combined with the resolution of 1200 x 1200 dpi and eight bit colour depth the system delivers rich, vibrant colour. To ensure that colour is reproduced consistently, unique Canon ARCDAT® real-time calibration technology automatically measures and fine-tunes image density for every job. Whatever your customers request, impress them with excellent quality every time.

Power more productivity

Productive speeds of up to 70 ipm and paper input capacity of up to 9300 sheets, enable you to power through demanding volumes. With on-the-fly refills, operators can load toner and media without stopping or pausing the printer. With this type of productive performance, flexible print, copy and scan capabilities and expanded media and finishing options, the imageRUNNER ADVANCE C9000 PRO system is one device that can do it all.

Expand your media possibilities

With exceptional media-handling flexibility, your production colour printer can produce high-quality jobs on uncoated, coated and special media, in sizes up to 330.2 x 487.7 mm (13" x 19.2") and media weights from 52 gsm to 300 gsm.

The perfect finish

With the imageRUNNER ADVANCE C9060 and C9070 PRO, you can print, copy, scan and collate with flair. A suite of finishing options that includes booklet making and trimming, stapling, professional punching, versatile folding and inserting vastly expand your application possibilities. Best of all, there's no need for offline desktop finishing devices that require extra handling and costly skilled labour. Whether your customers need high quality collateral, punched catalogues, booklets, folded flyers, personalised or versioned publications, you can get the job done - with the perfect finish.

Canon imageRUNNER ADVANCE C9000 PRO series

All-in-one production colour printer to advance your possibilities

Harness the full power of your production colour printer

A smooth, efficient workflow is the key to harnessing the full power of your production colour printer, your people and your processes. Together with you, Océ experts analyse your processes, applications and workflow, identify your requirements and formulate the right combination of controllers, hardware, and software for your business.

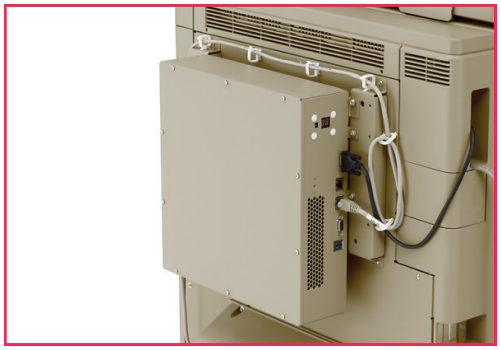
Intelligent software to streamline your operation

The system integrates seamlessly with Océ PRISMA® workflow software such as Océ PRISMAprepare, Océ PRISMAaccess, Océ PRISMAproduction and Océ PRISMAsatellite for ERP software. All this to manage central production, to connect to your desired workflow and to streamline job submission, which makes it easier for customers to do business with you. And with intelligent document design and makeready software, you can get jobs out the door faster, with better quality. A time- and money-saving solution that makes the most of your production printer.

"Streamline your workflow, strengthen customer relationships and get more done."
Workflow expert

Choose the controller that's right for you

Your colour workflow is as unique as your print business. That's why the imageRUNNER ADVANCE C9000 PRO series offers a choice of two digital front ends to provide the perfect blend of power and capabilities for your workflow.



imagePASS-A1

The imagePASS-A1 is a Fiery-based entry-level controller embedded directly in the imageRUNNER ADVANCE C9000 PRO system. It supports Adobe PCL5c/6 and PostScript 3 page description languages.

ColorPASS-GX300

The ColorPASS-GX300 high-end digital front end and the optional Graphic Arts Premium Edition provide advanced colour management capabilities. The Fiery-based controller supports extended variable data printing with PPML and Creo VPS compatibility and security features like a removable hard disk and standard secure erase functions.

"Make green business good business and gain a competitive edge."
Sustainability expert

Differentiate your business with a sustainable edge

As the focus on sustainable business grows, going green offers an important edge. With the imageRUNNER ADVANCE C9000 PRO series, sustainability starts on the inside. Device parts that are frequently touched by the user are built of bioplastic materials. And for about 40 different parts recycled plastics are used. Designed to minimise environmental impact, waste and unnecessary prints, your production colour printer consumes less energy and emits very low noise and carbon levels. Multiple-up printing on large, even recycled paper reduces waste, as does on-screen proofing with Océ PRISMAprepare software.

Designed for green operation

Engineered for years of reliable green operation, imageRUNNER ADVANCE colour printers have impressive environmental credentials: EPA Energy Star®, RoHS compliance, WEEE, REACH, Battery Directive and a low TEC rating. So go ahead, differentiate your business as a green business and gain a sustainable competitive edge.

Keep your print business running at peak performance with expert service

When we call the imageRUNNER ADVANCE C9000 PRO an all-in-one printer, we're not just talking about a multi-functional production colour printer that delivers the perfect balance of quality, productivity and versatility. We also mean that your investment is backed by the proven partnership of an industry leader. The award-winning Océ service organisation stands behind your colour system with expert support. Maintenance routines keep your system performing at its peak, and highly skilled technicians are on-hand to deliver uptime, all the time. It's the winning formula that keeps your print business as productive – and a partnership that gives you peace of mind.

"Keep your business productive job after job, day after day."
Service specialist

Canon imageRUNNER ADVANCE C9000 PRO series

All-in-one colour production printer to advance your possibilities

When it comes to advancing your possibilities, the Canon imageRUNNER ADVANCE C9000 PRO series is the perfect fit for your business. Why? Because you can configure the system to your unique needs with the right mix of controllers, media and finishing options to take on more jobs and expand your revenue-generating opportunities.

1 **Paper feed technology**
Advanced reliability through air separation and automatic paper size detection. Up to 9300-sheet paper capacity for media weights between 52 - 300 gsm and sizes larger than SRA3.

2 **pQ toner**
Adopts micro-dispersed pigment technology, which expands the colour reproduction area. pQ toner enables oil-free fusing and improved gloss performance for excellent image quality.

3 **E-drum**
With four individual drum motors for high colour consistency and stable quality even at higher print speeds.

4 **ARCDAT**
Real time colour calibration offering consistent high colour quality without manual intervention for large-volume jobs.

5 **Modular Twin Belt Fusing (TBF) system**
With full-circle Induction Heating (IH) for energy save fusing and enhanced gloss performance.

6 **Post inserter**
The post inserter has a 2 x 200 sheet capacity to insert preprinted sheets or document covers.

7 **Professional puncher**
The professional puncher offers a variety of exchangeable die sets in 12 different patterns: colour coil, plastic comb, pro click, velo bind, twin loop, ring bind and basic 2- or 4-holes.

8 **Folding unit**
The folding unit provides 5 folding types: Z-folding, letter fold-in and -out, half folding and double-parallel folding.

9 **Booklet maker and staple finisher**
Both finishers offer you up to 100-sheet stapled reports and manuals and optional 2- and 4-hole punching. Additionally, the booklet maker saddle stitches and trims up to 80-page high quality booklets.

Beyond the Ordinary

océ

Printing for Professionals

Canon and Océ join forces to provide cutting-edge technology and unmatched support to customers throughout the printing industry. In the office, Océ keeps the information of business and government moving. In manufacturing, architecture, engineering and construction, Océ wide format printers set the standard while our display graphics systems help people produce banners, billboards and other large, colorful applications. In corporate printrooms, marketing service bureaus and the graphic arts industry, Océ systems print transaction documents, mailings, newspapers, manuals and books on demand at the highest speeds. And Océ Business Services manage the complete document workflow of customers around the world. It all helps you go "Beyond the Ordinary" in printing and document management.
